TOTAL WEIGHT IN GRAMS						

Partial percent retained = $\frac{\text{wt in grams on a sieve}}{\text{wt in grams of sample used for a given series of sieves}} \times 100$

Total percent retained = $\frac{\text{wt in grams retained on a sieve}}{\text{total wt in grams of oven-dry sample}} \times 100$

For an individual sieve, the percent finer by weight = percent finer than next larger sieve percent retained on individual sieve
